OVERVIEW FRONTS AND HANDLES

## Front overview

The variety of designs is second to none. You can freely choose and combine finishing materials. A large selection of designs is also available for 'ART handleless'.

## Frentes – Visión de conjunto

La diversidad de muebles satisface todos los deseos. Puede elegir y combinar libremente los diferentes materiales. También se suministra una gran diversidad de los programas para el sistema ART sin asas.

## Elenco modelli

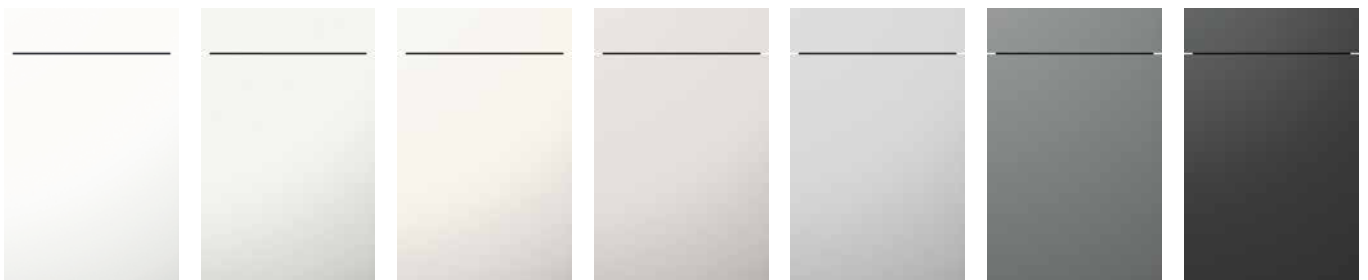

La varietà di modelli disponibili non lascia alcun desiderio insoddisfatto. Potrete scegliere e combinare a piacimento i differenti materiali. Anche per la cucina con la gola sono disponibili diversi modelli.

## Fronter – oversigt

De forskellige modeller opfylder alle ønsker. Du kan frit vælge mellem og kombinere materialeversionerne. Mange af programmerne er også tilgængelige til ART grebløs.

## Handles

There are many handle systems, apart from knobs and grips, which are supplied to match cabinet widths.

## Tiradores

Además de botones y tiradores, hay muchos sistemas de agarre, que se suministran conforme a las anchuras del armario.

## Maniglie

Sono disponibili diverse tipologie di pomelli e maniglie, tutte abbinabili alla larghezza degli armadi.

## Greb

Ud over knopper og greb findes der mange grebssystemer, der leveres passende til skabsbredderne.

## **With PURemission we are setting new exceptional standards!**

Advanced medicine, healthy food and a balanced environment: all of these factors make a major contribution to a healthy way of life. The drawbacks: stress and certain materials can lead to intolerances and pressure. Consumers are more sensitive than ever to topics such as formaldehyde.

Wood naturally contains formaldehyde. This can leak into the air in small quantities. We acknowledge the fact that we are currently one of the largest kitchen manufacturers, providing wood-based materials with the lowest emissions!

Through careful selection of timber materials and suppliers, since September 2017 we were able to change complete stock and process wood-based materials, where the formaldehyde content has been drastically reduced. The European standard is largely undercut and the high American standards are fulfilled by 100 percent.

PURemission stands for clean indoor air and quality at the highest level.

## **¡Con PURemission establecemos nuevos estándares!**

El avance en la medicina, una alimentación sana y también un entorno saludable contribuyen en gran medida a un modo de vida sano. Por otra parte: el estilo de vida, el estrés y determinados materiales pueden provocar intolerancias y un alto grado de estrés. Los consumidores se muestran más sensibles que nunca ante temas como el formaldehído.

La madera natural contiene formaldehído, el cual también se expulsa al exterior en bajas cantidades.

Con nuestras cocinas tenemos en cuenta estos hechos: ¡actualmente somos uno de los mayores fabricantes de muebles de cocina con todos los materiales de madera con las emisiones más bajas!

Gracias a una esmerada selección de los materiales de madera y de nuestros proveedores, en septiembre de 2017 se logró cambiar todo el inventario y procesar exclusivamente materiales de madera cuyo porcentaje de formaldehído fue reducido drásticamente. La norma europea queda en su mayor parte por debajo y los elevados estándares americanos se cumplen al 100 por cien.

PURemission representa un aire ambiental limpio y una calidad al máximo nivel.

## **Con PURemission abbiamo creato nuovi standard!**

I progressi nella medicina, un'alimentazione sana e un ambiente salutare danno un grande contributo per migliorare lo stile di vita. Gli aspetti negativi: lo stress e determinati materiali possono causare intolleranze e pressioni eccessive. I consumatori oggi sono sensibili più che mai su determinati argomenti, come ad esempio la formaldeide.

Il legno per sua natura può contenere formaldeide e la rilascia in piccole quantità anche verso l'esterno. Noi teniamo conto di questo aspetto ed attualmente tra i produttori di cucine componibili più grandi siamo quelli che impiegano materiali derivati del legno con le emissioni più basse!

Grazie ad una selezione accurata e consapevole delle materie prime e dei nostri fornitori, è stato possibile convertire l'intero stock già a settembre 2017 e lavorare esclusivamente materiali di derivazione del legno con un contenuto di formaldeide drasticamente ridotto. Le emissioni dei nostri prodotti sono sensibilmente al di sotto dello standard europeo e soddisfano al 100 % anche gli elevati standard americani.

PURemission è il simbolo per un'aria pulita in casa e per una qualità ai massimi livelli.

## **Vi sætter nye standarder – med PURemission!**

Medicinske fremskridt, en alsidig kost samt et passende miljø bidrager i stort omfang til en bedre levevis. Bagsiden af medaljen: Livsstil, stress og visse stoffer kan medføre intolerance og stressbelastning. Forbrugere er mere end nogensinde tidligere overfølsomme over for emner som f.eks. formaldehyd.

Træ indeholder fra naturens hånd formaldehyd. Formaldehyd slipper også ud i det fri i små mængder.

Det tager vi højde for: Aktuelt er vi en af de største køkkenproducenter, der benytter træmateriale med den laveste emission!

Gennem et omhyggeligt og ansvarsbevidst valg af træmaterialer og leverandører er det lykkedes for os, allerede tilbage i september 2017, at omstille hele lagerbeholdningen, så vi kun forarbejder træ, hvor indholdet af formaldehyd er nedbragt drastisk. For det meste ligger vi under den europæiske standard, og de skrappe amerikanske standarder overholdes 100 procent.

PURemission står for ren indendørs luft og kvalitet på højeste niveau.
